

SUBJECTIVE QUESTIONS

1. Which are the top three variables in your model which contribute most towards the probability of a lead getting converted?

Ans: The top three variables in model which contribute most towards the probability of a lead getting converted are:

1. Tags
2. Lead Sourced
3. What is your current occupation

2. What are the top 3 categorical/dummy variables in the model which should be focused the most on in order to increase the probability of lead conversion?

Ans: The top 3 categorical/dummy variables in the model which should be focused the most on in order to increase the probability of lead conversion are:

1. Tags with "Will revert after reading the email"
2. Lead sourced by "Welingak Website"
3. What is your current occupation_Unemployed

3. X Education has a period of 2 months every year during which they hire some interns. The sales team, in particular, has around 10 interns allotted to them. So during this phase, they wish to make the lead conversion more aggressive. So they want almost all of the potential leads (i.e. the customers who have been predicted as 1 by the model) to be converted and hence, want to make phone calls to as much of such people as possible. Suggest a good strategy they should employ at this stage.

Ans: Phone call during this period to be done to below;

1. People who are working professional
2. Lead who are sourced by "Welingak Website"
3. Tags with "Will revert after reading the email"
4. Tags with "Closed by Horizzon"

4. Similarly, at times, the company reaches its target for a quarter before the deadline. During this time, the company wants the sales team to focus on some new work as well. So during this time, the company's aim is to not make phone calls unless it's extremely necessary, i.e. they want to minimize the rate of useless phone calls. Suggest a strategy they should employ at this stage.

Ans: In this condition they need to focus more on other methods like automated mails & SMS. This way calling won't be required unless it is an emergency. The above strategy can be used but with customers that have a very high chance of buying the course without much follow ups.
